

***** 30/07 (ORIGINAL) SERIES NEATHEAT COVERS FIT HEATERS THAT FALL WITHIN THE FOLLOWING PARAMETERS:**

A = The measurement from the wall to the front edge of the metal enclosure attached to the wall. This measurement must be 2" or less.

B = The measurement from the wall to the front edge of the heating element with the original face panel removed. This measurement must be 3" or less.

C = The measurement from the floor to the top of the original cover. This measurement must be 6 $\frac{3}{4}$ " or greater; if not back plate must be raised.

D = The measurement from the bottom of the front cover (or bottom of the heating core if front cover is missing) to the top of the original cover. This measurement must be 6" or less.

*****80/09 (TALL) SERIES NEATHEAT COVERS FIT HEATERS THAT FALL WITHIN THE FOLLOWING PARAMETERS:**

A = The measurement from the wall to the front edge of the metal enclosure attached to the wall. This measurement must be 2" or less.

B = The measurement from the wall to the front edge of the heating element with the original face panel removed. This measurement must be 3 $\frac{1}{4}$ " or less.

C = The measurement from the floor to the top of the original cover. This measurement must be 7 $\frac{1}{2}$ " or greater; if not back plate must be raised.

D = The measurement from the bottom of the front cover (or bottom of the heating core if front cover is missing) to the top of the original cover. This measurement must be 6 $\frac{1}{2}$ " to 7".
